1. Application Overview

'eSignDashboard' is an iPad based application to manage PDF documents and to add annotations (like text, time stamp and signature) to them. This application also allows you to update the PDF document by adding pages from other documents, delete pages from existing document, rotate single page or entire document, lock document for security purposes and send documents via email and fax.

2. System Requirements

- eSignDashboard version 1.1.
- Connection to Internet.
- Compatible IOS version 4.3 and above on Apple's iPad device.

3. Installation

You can download the application directly from the Apple 'App Store'. To download the application you need to have 'App Store ID'. It does not require any separate installation process.

4. Splash Screen

Splash screen displays list of already existing products from the GoPaperless Solutions Inc. and list of upcoming products.

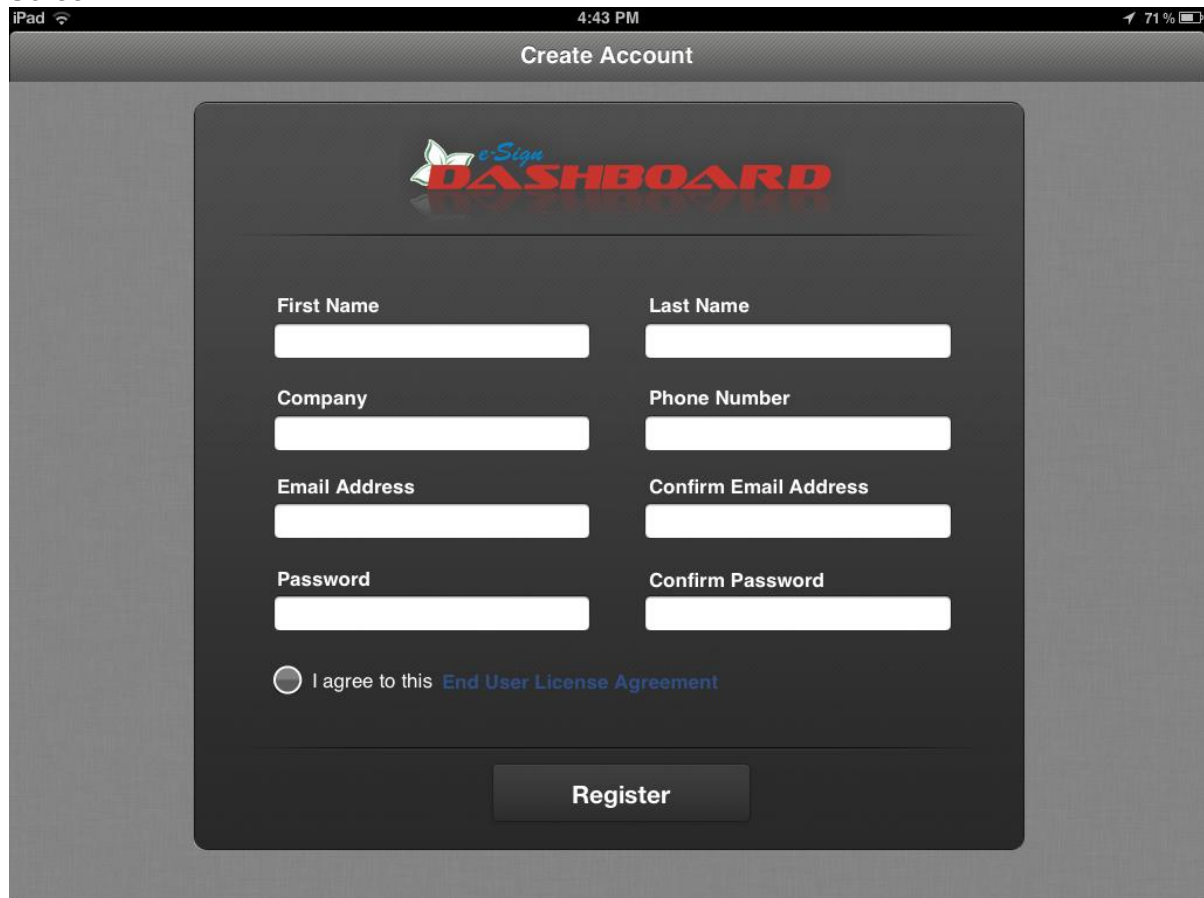

5. Registration Screen

When you start eSignDashboard application for the first time, you will be asked to register the application.

Registration requires an internet connection. You will not be able to use the application until it is registered.

Registering the application is simple and easy and the process takes only a few minutes as it only requires starting the application and entering your details which also includes login details. The application will be fully functional as soon as the registration is completed.

Once you register successfully in the application, system navigates you to the Login Screen.

The screenshot shows the 'Create Account' screen of the eSignDashboard application on an iPad. The screen has a dark background with a central white form. At the top of the form is the eSignDashboard logo. Below the logo are two columns of input fields: 'First Name' and 'Last Name' in the first row; 'Company' and 'Phone Number' in the second row; 'Email Address' and 'Confirm Email Address' in the third row; and 'Password' and 'Confirm Password' in the fourth row. Below these fields is a radio button followed by the text 'I agree to this [End User License Agreement](#)'. At the bottom center of the form is a 'Register' button. The iPad status bar at the top shows 'iPad', signal strength, '4:43 PM', and '71%' battery.

5.1 Registration

1. First Name, Last Name, Company and Phone Number: Enter your 'First Name', 'Last Name', 'Company' and 'Phone Number' in order to register the application.
2. Email Address: All eSignDashboard accounts are protected by a username and a password. When both registering a new account and logging in with an already existing account, users will need to provide the username. The username must be a valid e-mail address to which all eSignDashboard related e-mails (including forgot password email) will be sent.

Confirm Email Address: 'Email Address' and 'Confirm Email Address' must be same in order to register the application. eSignDashboard provides this facility to eliminate any accidental errors.

3. Password: You are required to supply a password when both creating an account and simply logging in. eSignDashboard offers use of alpha numeric characters along with some special characters (only *, !, \$, £, %, @) for creating password. Note that users will need to remember the password to be able to re-login if needed.

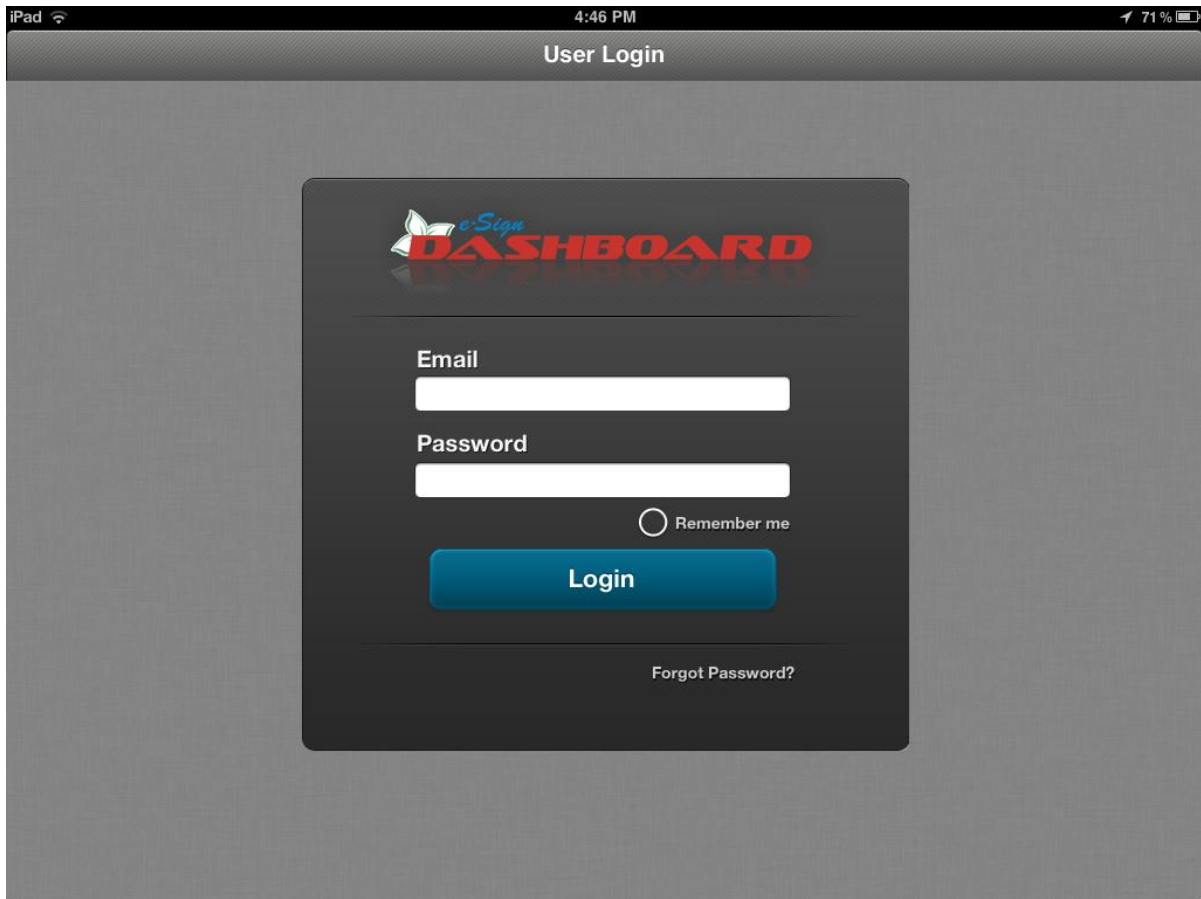

Confirm Password: 'Password' and 'Confirm Password' must be same in order to register the application.

4. End User License Agreement: Informs you about 'End User License Agreement'.
5. Register: All the personal data entered by you will be sent to eSignDashboard Server for record.

On successfully completion of the registration process, you will be redirected to the Login page.

6. Login Screen

As 'eSignDashboard' is a very much concerned about the privacy of the user, application asks you to login every time the application is run. Application asks you to login if you bring forth the application from the background process. This can be changed through 'Settings' menu.

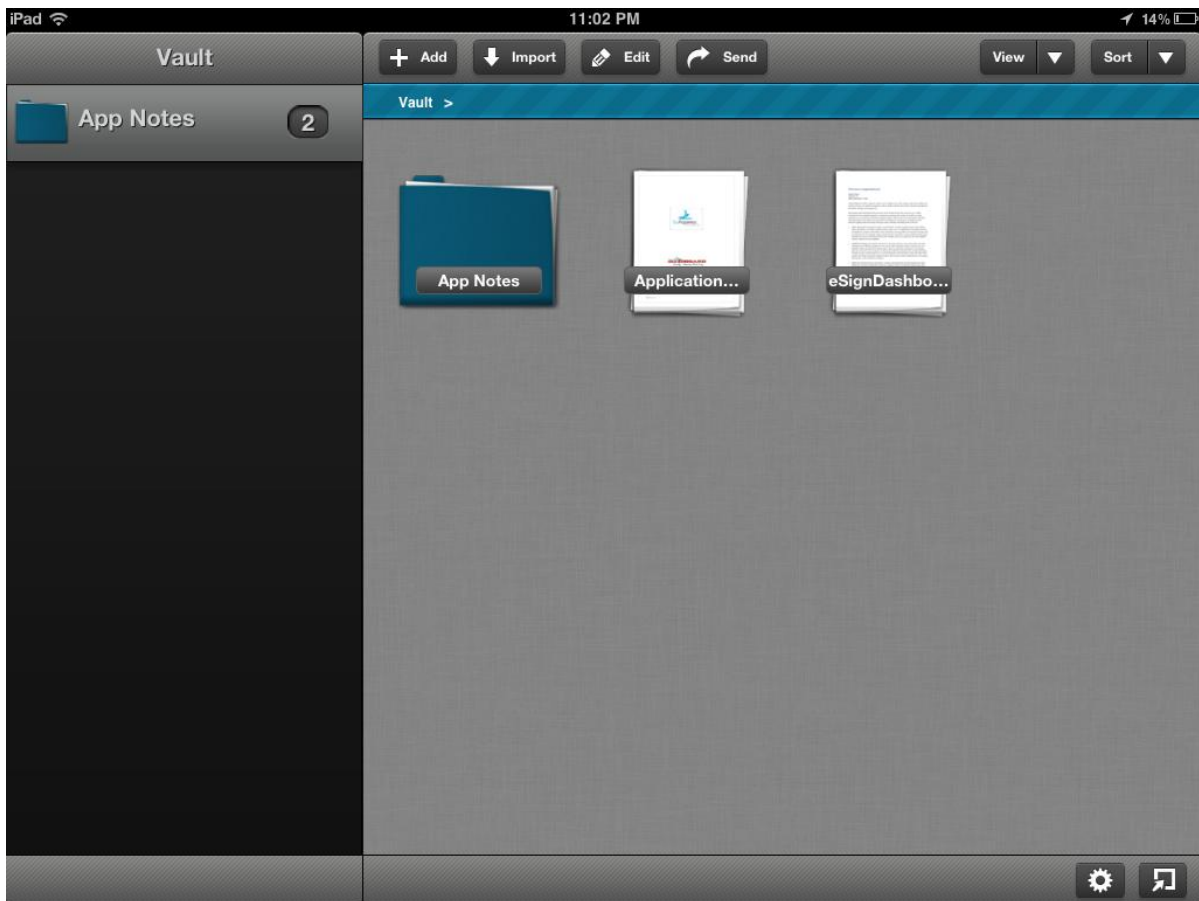

6.1 Login

1. Email Address: Enter your registered Email address to login into the application.
2. Password: Enter your registered password to login into the application.
3. Remember Me: 'Remember Me' will remember your email address only.
Note: 'Remember Me' will function only when valid Email Address and Password is entered and 'Remember Me' check box is checked.
4. Login: Application will navigate you to document manager screen.
5. Forgot Password?: Sends Email to the registered email address with the password for the application.

Note: For Email to be sent to registered email address, device must have internet connectivity.

7. Document Manager

Application will navigate you to Document Manager's root folder (i.e 'Vault') screen after providing valid credentials. Document Manager provides easy access to your documents with the help of folder structure. Left panel of the document manager displays list of folders present in the parent folder. Count next to the folder name in the left panel indicates number of files and folder within the folder itself. In portrait view left panel is not visible. When you tap on the folder name button, it opens a popup which displays the left panel like structure. You can navigate to previous folders by tapping on 'Back' button or navigate to sub-folder by tapping on a folder. Right panel displays the files and folders present in the parent folder. You can tap on any folder to explore it or document to open it in Document Editor.

7.1 Document Manager

1. Folder: Tap on any folder icon to explore the contents of the folder. When you open a folder the breadcrumbs will also be updated accordingly.
2. Document: Tap on the Document icon to open the document in document editor.
3. Breadcrumb: You can tap on a folder name in breadcrumb to navigate to that particular folder. The breadcrumbs will also be updated accordingly.
4. Back: You can tap on Back button to navigate to previous folder.

5. Add: You can tap on the 'Folder' option displayed under 'Add' button to add new folder in current folder.

6. Import: You can tap on the 'From email' option to displays instructions for opening documents from Email client or 'From URL' option displays text box to enter PDF URL and download it from internet.

Note: Import functionality requires your iPad device to be connected to network connection.

7. Edit: When you tap on the Edit button check box appears below folders and

documents and following command buttons will be displayed at the bottom bar of the Document Manager.

Move: You can select multiple folders and documents to move from one folder to another.

Copy: You can select multiple folders and documents to copy to another folder.

Rename: You can select single folder or document to rename it.

Delete: You can select multiple folders and documents to delete from the document manager.

Open: You can select multiple documents to open in document editor. When you select multiple documents to open they will be opened in tabbed view.

Cancel: You can tap on cancel button to move out of the Edit mode.

Edit: You can again tap on Edit button to move out of the Edit mode.
