

# Cloud Integration

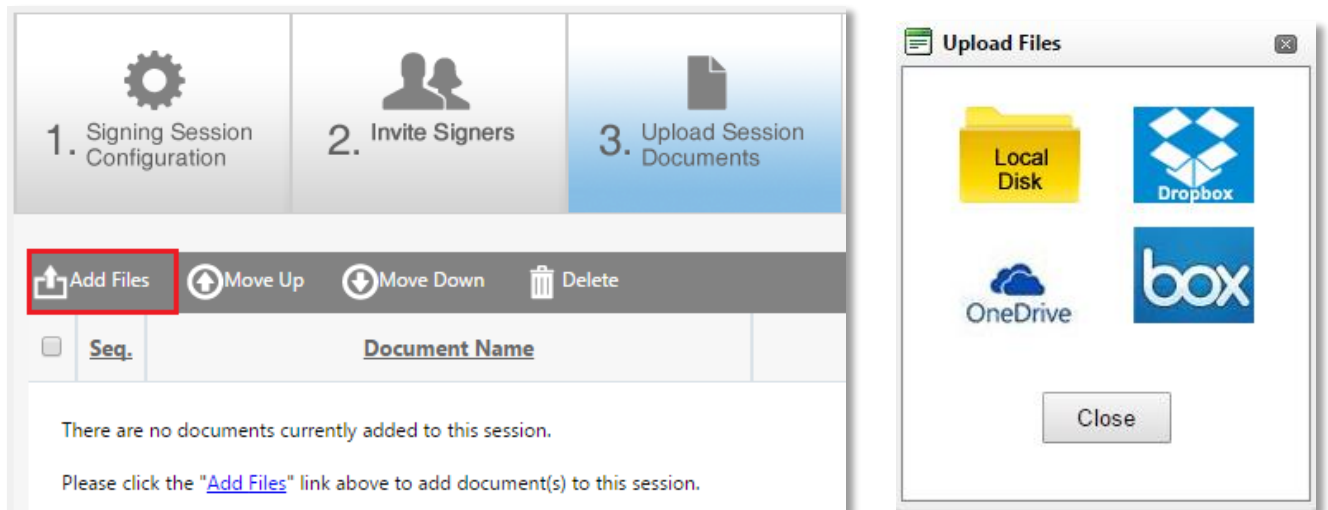

## Overview

Cloud integration provides users the ability to seamlessly add documents from their Box, Dropbox and OneDrive accounts. Once the session is completed, the signed documents will be automatically uploaded into the external cloud storage account as a zip file. This feature is a great way to upload additional documents directly from your iPad, Android, Windows and other tablet devices.

Cloud integration is described in greater detail below.

## Cloud Integration

On Step 3, select 'Add files.' When the popup appears, select which option to upload your document from.

## Upload Files: Local Disk

This option allows you to upload documents directly from your local computer including your documents, downloads, and desktop.

## Upload Files: Dropbox

This feature allows you to upload directly from your Dropbox account. Simply select the icon and log into your account. Dropbox will ask for permission to access your documents. Select 'Allow' and continue.

Sign in to Dropbox to link with eSignOnline

**eSignOnline** would like access to its own folder,  
Apps > **eSignOnline**, inside your Dropbox.

Cancel

Allow

After granting access, you can select your documents needed and continue building the session. Once the session is completed, the documents will automatically upload into your eSignOnline subfolder under Apps.

### Upload Files: OneDrive

This feature allows you to upload directly from your OneDrive account. Simply select the icon and log into your account. OneDrive will ask for permission to access your documents. Select 'Yes' and continue.

A Microsoft Account permission screen for the application 'eSignOnline.net'. The screen features the Microsoft logo and the text 'Account'. The main heading asks 'Let this app access your info?'. Below this, it lists several permissions that the application needs, each with an icon and a brief description. At the bottom, there are 'Yes' and 'No' buttons.

Let this app access your info?

esignonline.net

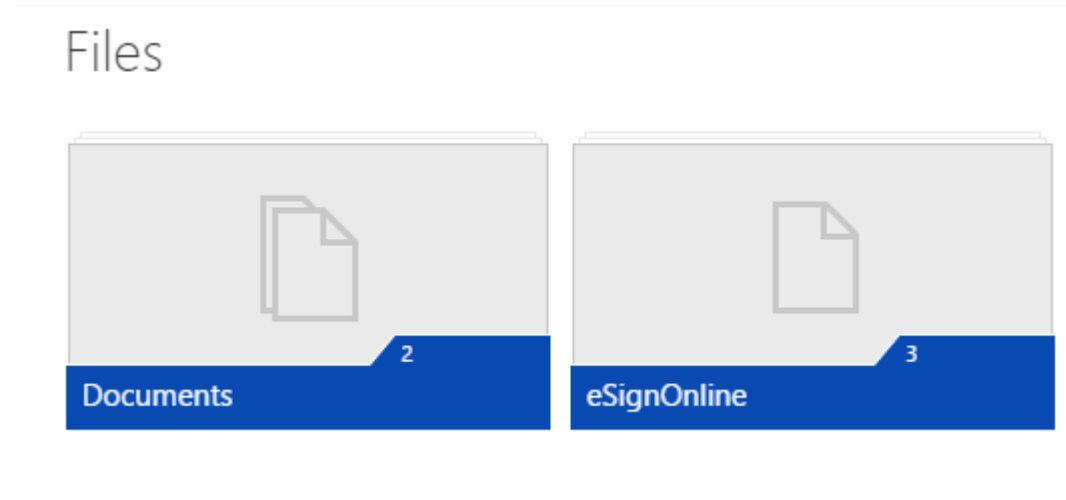

eSign needs your permission to:

-  **Sign in automatically**  
Signing in with your Microsoft account will automatically sign you in to this app.
-  **View your profile info and contact list**  
eSign will be able to see your profile info, including your name, gender, display picture, contacts, and friends.
-  **Access your info anytime**  
eSign will be able to see and update your info, even when you're not using this app.
-  **Access and edit your OneDrive photos and documents**  
eSign will be able to access, change, and add or delete your photos and documents on OneDrive.
-  **View photos and documents on OneDrive**  
eSign will be able to see your files and those shared with you on OneDrive.
-  **Access photos and videos**  
eSign will be able to see your photos and videos on OneDrive, those shared with you, and their tags and comments.

You can change these [application permissions](#) at any time in your account settings.

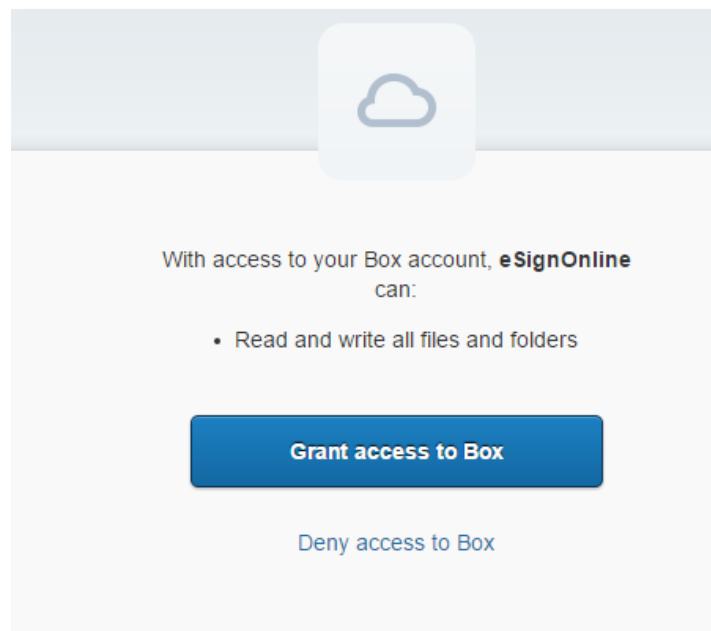

Yes No

After granting access, you can select your documents needed and continue building the session. Once the session is completed, the documents will automatically upload into your eSignOnline files.

### Upload Files: Box

This feature allows you to upload directly from your Box account. Simply select the icon and log into your account. Box will ask for permission to access your documents. Select 'Grant access to Box' and continue.

After granting access, you can select your documents needed and continue building the session. Once the session is completed, the documents will automatically upload into your eSignOnline folder.
